Principal's Message

École Sir John Franklin High School opened its doors back in 1958 and today we celebrate the 65th graduating class of SJF.

Many positive thoughts that rush to my mind when I look out at this grad class; The ups and downs of your first four years of high school, but it finally comes all together in your final semester. What these young adults have experienced during that time will only make them stronger – whether it be restrictions or an evacuation. They have developed some skills that I am sure they do not even realize they have: skills of resiliency, perseverance, adaptability, and much more.

I am sure that back in 2020 as you were entering high school it was not at all what you pictured or even wanted. As you reflect on your time here at SJF today and in the years to come, it would be easy to point out the challenges you faced. I ask you to see that you have made it through and by getting on the other side of these obstacles you have grown.

It is easy to look at points in your past and even today and be overwhelmed. Today I ask you to look to the future with a positive lens, positive attitude and positive belief...belief that you can make a difference.

You all have the capacity to make a difference. Life will throw its curve balls at you, but you have the heart, brains, and experience to navigate life's challenges.

Using your "Resiliency" as a superpower – you have it within you. This will enable you to make a difference in our world.

I echo what Ms. Schlosser said last night – use kindness – buckets of it – the world needs it, especially from tomorrow's leaders. This builds trust in people. I see many of you being our future community leaders...James (that is with a J) and Emma may have mentioned last night in their speech...you are tomorrow's leaders. When I look out to see this class I see many of you playing a big role in Yellowknife in the near future...you may leave on an adventure but I see many of you returning as teachers, nurses, mechanics, support workers, business owners, carpenters, lawyers, counselors, doctors, and much, much more.

Just remember – to move forward with kindness, heart, and a positive outlook.

When you do remember high school in the years to comememorable moments that you shared together will be stories you will tell:

Challenge Cup Sweep this year for Aubrey, Ellie, Emma, Chelsea, Emily, Hannah, Kali, Maica, Morgan, Rebecca, Riley, Skyra, Sydney, Talia – Boys; Bradley, Braden, Cooper, Malachi, Joe, Duncan, James, Riley, Spencer. I am sure the stories will grow over time of the domination of 2023 and the cups coming home where they belong.

- Soccer/Volleyball/Basketball tourneys and banners
- Drama and Music productions especially the ones that feature the Band "Fridge"
- Debate Club with top debater Anya (and her brother James...oh those poor parents)
- Robotics class with Mr. Morozov (Ian – Shawn – Rebecca)
- Goofy grad activities
- Chess in Kirkham's room
- Working on math in Ms. Schlosser's room over lunch – where these students want to compete in a Math Contest vs. St. Pats – thanks to Tasir & Roald
- Sitting around in Shantora's room playing music
- Hanging out in the foyer
- Times that you will miss

I am sure that all your parents will tell the story of your first day of school many times over the next few weeks – or they may already have been telling the story and showing pictures for the last few months. This is usually where I lecture the grads about thanking the people that supported them to get them to today. Well the kids have for sure heard this many, many times from Mr. Curran, Ms. Martin and myself, maybe even 100's of time over the last four plus years. Today I ask the parents and families to let your "Grad" know how proud you are of them and fill them with confidence. Let them really know how you feel about them.

It has been a pleasure to get to know you – see you challenge yourself and want a better world. By getting here today, through all that you have been through you must be proud of yourself. I could not be prouder of this class. You will look back on high school years and remember what you all have shared together. Your bond may be stronger than any other group before you.

My advice – (and no Lachlan Dunn – you do not need to write this down like Mr. Curran's advice from last night). As you step into the next chapter of your lives, remember that the choices you make today will shape your future. Embrace every opportunity with courage and determination, and never be afraid to pursue your passions. Stay true to your values, support one another, and continue to learn and grow every day; the world needs your unique talents and perspectives.

Come back to visit...lets exchange stories

I look forward to what life bring each of you – all the best Class of 2024.

Thank you,

Cole Woodland

"Clear Comms"

Brooke Yendo

"For my GC"

Ibeh Zoe-Chocolate

"Thankful for this journey"

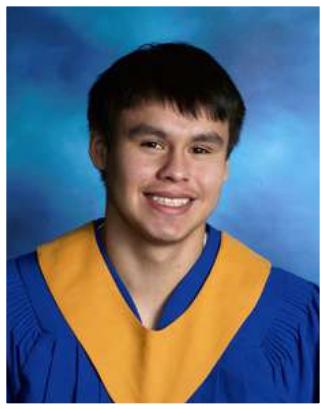

Voted Most Likely

Kali Skauge
Most likely to be a PTA parent

Sahal Malin
Most likely to be late for grad

Stephen Moore
Most likely to become a professional athlete

Ellie Loutitt
Most likely to become a reality tv star

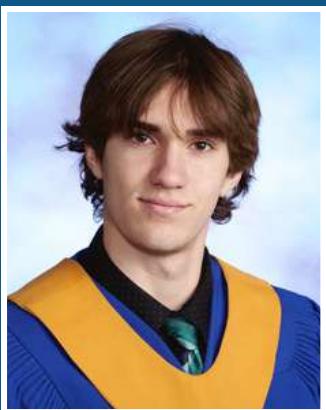

Konner Lindsay
Most likely to survive the hunger games

Rudi Slagter
Most likely to be a Yellowknifer for life

Hannah Vu
Most likely to become an influencer

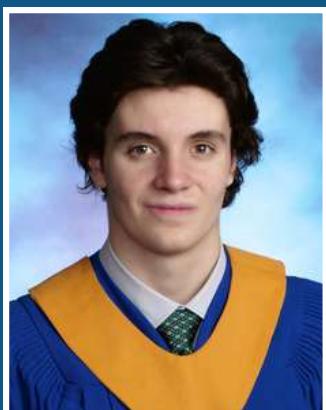

Cole Woodland
Most likely to get married first

Mason Kelsey
Most likely to get their license taken away

Nole Barichello
Most likely to be in a bromance

James Rogers
Most likely to be in a bromance

Solaya Meserah-Zybb
Most likely to always be the best dressed

Voted Most Likely

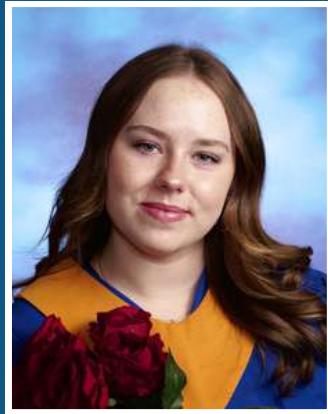

Byran Clinton

Most likely to go to space

David Kwong

Most likely to become a millionaire

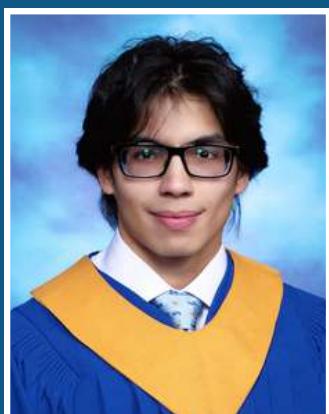

Emily Hazenberg

Most likely to have spent the most at Starbucks

Joe Curran

Most likely to replace Mr. MacInnis

Cooper Mcleod

Most likely to become a politician

Adib Ashraf

Most likely to get ID'd when they're 30

Sheldon Bisallion

Most likely to win the Lottery but lose ticket

Tasir Bhuyian

Most likely to cure cancer

Thank You Teachers!

by Chelsea Rowsell

Good evening, everyone! For those who don't know me, my name is Chelsea Rowsell. If someone had told me back at the beginning of the school year that I would be standing here tonight giving a speech in front of this many people, I would have told them that they were absolutely crazy. But here we all are, so let's make the most of these next few moments as I share some words of appreciation for the incredible staff that we have here at Sir John Franklin.

I would like to start by expressing my deepest gratitude to our amazing teachers on behalf of the graduating class of 2024. Today, as we stand here on the edge of a new chapter in our lives, it's important to take a moment and reflect on the incredible impact our teachers have had on us.

To our teachers, thank you for your unwavering commitment to our education. You have not only shared knowledge of your subjects, but have also instilled in us the importance of learning. Your passion for teaching has been truly inspiring, and you've made the classroom a place where we felt motivated, supported, and encouraged to challenge ourselves and reach for our dreams.

Thank you for going above and beyond to ensure our success. The late nights spent grading papers, the countless hours of lesson planning, and the extra time you took to provide guidance and support have not gone unnoticed. You have invested so much of yourselves into our growth, and we will be forever grateful for all of it.

Your belief in us, even when we doubt ourselves, is a driving force behind our achievements. You've pushed us to reach our potential, challenged us to think critically, to question, and to strive for excellence. Your guidance has not only prepared us academically but has also equipped us with the tools to navigate the many and varied challenges that lie ahead in our futures.

Beyond the classroom, you've been mentors, role models, and in some cases great friends to lean on when needed. You've listened to our concerns, celebrated our victories, and offered a shoulder to cry on during difficult times. Your unwavering support has made us feel valued and cared for, and we are incredibly fortunate to have had you by our side throughout this journey.

As we embark on the next chapter of our lives, we carry with us the knowledge, skills, and memories that you have helped to create. We are ready to face the world, prepared with the lessons you've taught us, and the belief that we can make a difference.

Thank you to all the teachers who took time out of their schedules to write letters of recommendation for our post-secondary school applications and pushed us to reach the millions of deadlines that were being thrown at us. Thank you to all the staff members who have volunteered their time to coach school sports. Thank you for all the work you have put in to try to make these past four years the most memorable, even when we were thrown into situations that were far from ideal. Between global pandemics and wildfire evacuations, our high school years have been very different from what most of us imagined they would be, but you guys did everything you could to make it the best experience possible for us, and we wouldn't trade that unique ride for the world.

I can't thank each staff member individually, but I would like to take a minute to acknowledge a few. Thank you to Ms. Oldford for being there for many of us all the way from kindergarten up until our graduating year. Thank you to Mr. Grady and Mr. Green for following us from William Mac to Sir John. We all know you did it just to watch us grow into who we are today (or maybe it was to get away from Mr. Seabrook and morning wake-up); let's just go with the first one. Thank you to Mr. Kirkham for all of the library passes after class lectures (I promise every single one was used productively). Thank you to Mr. Curran for calling on me to read out loud to the class during our novel study even though we both knew that was the last thing I wanted to do ... kind of ironic standing here now. Thank you to Ms. Schlosser for encouraging us to build confidence to participate in group discussions and remind us it's okay to make mistakes. Last but not least, thank you to Wendy and Ms. Martin for giving amazing advice and always putting a smile on our faces.

With that being said, if I didn't specifically mention you tonight, I do want to make it clear that every single staff member has had some kind of connection and/or impact on at least one of these graduates sitting here tonight. Most of us would not be where we are or who we are without you guys.

So, on behalf of the graduating class of 2024, I again want to say a heartfelt thank you to our teachers. Your dedication, passion, and commitment have shaped us into the kind, capable and forward-thinking young people before you tonight. We will forever cherish the memories we've created together, and we will always be grateful for the incredible impact you've had on our lives.

**Thank You,
Chelsea Rowsell**

Thank You Parents!

by Kali Skauge and Joseph Curran

 Kali
 Joe

Thank you Mr. McInnins for the warm welcome. Hi, I'm Kali.

And I'm Joe. We'd like to thank everyone for the opportunity to speak tonight and offer a toast to the parents. I'd like to give a special nod to my family and especially my grandparents for being here. Theirs is the quintessential immigrant experience. 45 years ago they left a crumbling society in their native Vietnam in hopes of giving their children a better life in Canada, and I know the security and opportunities I've enjoyed to this point in my life are due in large part to all that they were willing to sacrifice in hopes of a brighter future.

I too would like to say hi and thank my grandparents, who have travelled from Saskatchewan and North Dakota to be here tonight. Their journey to Yellowknife, Joe, might not have been as harrowing as your grandparents', but they certainly did risk a lot by choosing to check their luggage with WestJet.

I know most of you know my dad. Some may know him as Mr. Curran, Coach Peter, "cur-dog", but I know him as my father. Not only that but as a teacher and vice-principal of the institution he's been at for almost 30 years. Many of you think he's serious, intimidating, and maybe even scary; and it's true. You think the crap he gives you guys at school is bad, you should try living in the same house with him.

Well, Joe, why is it that our dads are on our cases all day at school, give it to us at the rink and then fill our ears the moment we walk through the door at home? I think the reason why our parents are tough on us sometimes is because they want us to learn something. And although we don't always want to accept, agree with or believe it, I think the trouble they give us just shows how much they care and how much they love us. After all, it must take a lot of energy hassling us all the time.

- You're probably right, Kali. Why is it that Danielle makes Malachi clean the house for seven hours every weekend? It's because she's trying to teach him what it means to be responsible.
- Why did Maica's mom force her to wear three-inch heels to the music concert last week? It's because she's trying to teach her something about social etiquette and respect.
- Why is it that Colton's mom doesn't let him take his snowmobile out on his own, even though he's seventeen years-old? Because she's trying to teach him a lesson about personal limitations.
- Why is it that Owen Reitsma has been grounded 15 times in the last three years? It's because Steve and Laura want to teach him about boundaries.
- Why did your dad bring a copy of Riley Hodder's report card into the dressing room during Challenge Cup practice last year? He wanted to teach his players something about accountability . . . and pure terror.

I remember one time my dad wanted me to understand the importance of appreciation. Let me give you the details. I was about eight years-old, and my dad had just bought me a package of wine gums from the gas station. At the time, wine gums were my favorite candy, and being a student of the school of delayed gratification, I decided to save them for later when I would have a chance to savor them. Well, grads, I don't know what it's like at your house, but I made what was a critical error in my house: I left my wine gums on the counter in plain view. You guessed it, when I walked by about an hour later to retrieve my loot, I found the bag ripped open and only 3-4 candies remaining. Now, I don't remember if I blamed my dad or my sister, but I do know that I gave full reign to my outrage. Well, my father who had worked hard all day, and who had paid for the wine gums in the first place was in no mood for an indictment from his sanctimonious, unappreciative son, and he let me know that I should zip it and be thankful for what I had left. An hour later, though, when we were on our way downtown in the truck, I was still at it. Nearing the limits of his patience, he threatened me with, "If I hear one more word about those wine gums, I am going to pull this vehicle over, and you will be sorry."

I decided to call his bluff.

Next thing I know I am standing on the side of the road watching my dad's tail lights receding in the distance. I stood rooted a minute, waiting for his brake lights to signal that he had reconsidered. The minute passed, and I turned for home . . . on foot. **Message received.**

Thank You Parents!

Joe, I get it, I get it; there's something to learn in all of that, I know. But do our parents always have to take it to the extreme? Picture this, it's the spring of 2016, I am in Ms. Alyssa's grade 4/5 split class at NJ McPherson, and she asks me to stay late in class over lunch. While I originally thought I was in trouble, she told me she had something important to talk to me about. So she sits me down at her big, bean-shaped, purple desk and asks me if I would be okay with my Women's-Health Nurse-Practitioner mom teaching an upcoming lesson in health class. I've always been very proud of my mom, I know how hard she works, so I said sure! I asked which lesson . . . nutrition? "Nooo" she said, "not that one. Another one, something just as important."

Oh no . . . she didn't?

Yup, you guessed it: Sexuality and Reproductive Health. In my shock, I must have nodded in agreement because a few weeks later I'm sitting in horror while my mom flips through a very detailed full-colour slideshow; holds up some very accurate, full-sized models; and answers every single excruciatingly specific question asked by my 10-year-old classmates. To this day, I am still reminded by friends about the day my mom truth-bombed us all on the birds and the bees.

I guess it's safe to say that even when parents throw us out of the car, traumatize us in front of our classmates, unplug and hide the wifi router, hassle us about our homework, implement a hard curfew, make us dress for the weather, not for a fashion show, they are really just trying to show how much they care. Although it may not seem like that at times, our parents are always looking out for us and trying to prepare us for a time when they are not going to be around. Now, neither one of us is a parent, but we have extensive experience being parented. We do know this: although they sometimes drive us crazy, and they seem to have no idea what it's like being a kid, we know that our parents are deeply committed, loving, and oh so proud of the young people we have become. Tough love, after all, is still love, and the parents here tonight continue to make that clear again and again.

Whether it's Duncan's dad buying him his fourth hockey stick of the season, Amna's mom making the most delicious food to share on multi-cultural day, or Cohen's dad Darren hauling newly-built storage sheds to their new homes, our parents have always found ways to deliver the goods.

We'd like to express our deepest gratitude to all of our parents for encouraging us to step outside of our comfort zones;

We'd like to thank our parents for always showing up, and supporting us from the sidelines. Your presence has meant the world to us;

We'd like to highlight our appreciation for the late nights, early mornings, and all the time you took out of your days to take care of us.

We thank you for being parents. Your love and support has helped us get here today, and will serve us well beyond today. It goes without saying, we could not have done it without you, but it bears repeating, thank you.

Thank You,
Kali Skauge and Joseph Curran

Class Prophets

by Emma Carey & James Rogers

Emma
James

Good evening to all, parents, teachers, graduates, and all individuals present. We are gathered here today to celebrate our graduating class of 2024.

and were very glad glad to see you here Riley Hodder.. I saw you handing in your English assignment to Bauldry as we walked in this evening.

Yes, we're very glad you made it!!

For those of you who might not know, I'm James.

and I'm Emma

May we present the most important speech of the night, the class prophecy .

He (depends who's speaking what) doesn't mean that, we couldn't be here today without our parents and teachers so those thank-yous are important... however I think he/she meant the funniest (hopefully).

Now its time to look into the future of our graduating class with our special hat and see where they are going to be

But you're putting the hat on right?? Because I did not sign up to mess my hair up. AND we have to go through our whole grad class?? Folks, let's get comfortable in your chairs and hope you don't have to go to the bathroom any time soon.

I guess ill wear the hat if it makes me smarter. Mrs. Martin told us you can tell the future with it so ill trust her.

Okay - But - again, we have to do ALL our grad classes???

No no don't worry, we won't be able to fit everybody since we are fortunate to have such a big grad class, however we will get everyone we can. Lets hope you enjoy the speech, and without further ado here are the nominees for the 2024 grad---- cutoff.

Wait! No! it's not like that

Well then how do we start the speech

You have to put the hat on and it just magically starts popping up in your head.

Wait, do you see that?? Is that.... MASON

Oh no.. is he walking into jail?

Oh it looks like it. Definitely all his speeding tickets he's gotten.

But look at that, Anya is walking behind him so she must be his lawyer once again.

Anya is getting rich off the number of times our grad class needs a lawyer.

She's going to be rich so- wait, do you see that???

Is that the band group??

No way they are on the main stage at FOLK, with Keira as their lead singer! That's insane!

Did you hear how Tristan is the star in the Head and Shoulders commercial?

Honestly, that doesn't surprise me I always wished I had his hair.

Class Prophets

And let's talk about the students from Night School and the Snap Program

Haven't you heard? They are all professionals now since they started work earlier than the rest of us.

Yeah... you think they'd give us a loan? They are definitely making bank.

You know may be we should ask.

Do you see that? The famous Field House canteen is still up and running.

Doesn't Kadriye own it now? I used to love going there, maybe we should go back for lunch tomorrow.

Wait did you know that we have students in the Guinness World Record for Canada?

Yeah, isn't Hannah in there for Canada's worst driver after she ran into her Garage, Lachlan for eating the most live moths. And Avery for never stopping to laugh.

Yeah isn't that cool.

And lets talk about Wyatt... Do you think he'd be able to help all the Sir John students who are going to skills automotive to win?

Hmmm yeah because he is the tech chair now.

Why don't we jump to talk about all the students on principal and the Honour Roll lists who kept our grad class average up

Yeah... they went from carrying our GPA to carrying the world in technologies, engineering, ground breaking medical reasearch and exploring space.

And can we talk about Seth Barnes???

Yeah isn't that crazy, he just won the Citizenship award for all of Canada with how much he does around our community.

OMG! Do you see that??? Is that...

Gwan running late to the bus again?? Hes going to be late for work.

I guess he hasn't learned from the Fort Smith Volleyball trip.

Yeah, and too bad Madison can't drive him since she's still trying to get her learners.

And Jacob is in the Olympics for swimming

Yeah... I'm glad he was able to work through his muscle imbalance.

Thanks to Fran

Speaking of sports.... We have three professional athletes now from our grad class.

Thats right I saw that in the paper not to long ago, Stephen, Spencer and Ellie are all paving their way through the Canadian national team.

and malachi is the best marathon runner after he succeeded in track and field and ditched skiing.

Don't forget Joe, he's the best skier in Yellowknife!!

Also did you hear that when Rudi and Hawke are not touring around Canada for their traveling band out of the Delica van, Rudi is fighting fires...

Class Prophets

Yeah.. thanks for the putting the fire one summer by the way Rudi.

and David is still unable to come up with that helicopter Kali's always asking for

and Kali's still going around the classroom telling her kids about her glory days at Tindi.

while the rest of the Tindi crew still work there.

Did you also know that all the students who can speak french are working all across the country with these big companies translating for them.

That's so cool I wish I was able to speak French

Sydney is one of the top competitors in the show Alone, she's going into the final next week or something

I always knew she would be a hunter girl...

Yeah, Maica and Riley have been posting all over their social media about it cheering her on.

I hope she ends up winning. But I think we got the majority of our grad class, nobody asked us to look into their future right?

Yeah no one specifically asked us so I think that's it.

Let me look at the list real quick...

COOPER

Sorry about that Cooper.... But we know you are succeeding after receiving that bio award.

He won a bio award?

I think so... Honestly I can't remember.

Well, those are some crazy future plans for the class of 2024. And if anyone else wants to know what their future looks like, you can come find us and put the hat on for a small cost of \$59.99!

I think it's pretty accurate. I guess we will find out in 10-30 years when we have our reunion.

If we even get to a reunion... Mr. McInnis, you think we could set up a reunion in 25 years?

Where is that little guy? Ugh, I can't see him. Someone's little sister is probably standing in front of him

Wherever anyone ends up, we always wish the best for our fellow grads

And we want to say thank you to everyone sitting through this speech and allowing us to predict the future for our grads.

We hope you guys had some laughs and enjoyed our speech.

And a special thank you to Ms. Martin for giving us her special hat to see what the graduating class of 2024 future's look like.

Thank You,
Emma Carey & James Rogers

Valedictorian Address

by Colton Tumoth

When I began drafting this speech, it drew me back to many previous classes and school memories, and through this, one thing has become quite evident. We are all so different today from the people we were just four years ago when we stepped into Sir John for the first time. While our high school journey has been filled with the regular ups and downs, and generational challenges to overcome, all have ultimately helped shape us into the gritty, determined and conscientious people we are today.

We live in a strong community, full of people who have supported and guided us throughout our time living here. No matter who you are or what you have accomplished throughout your time in Yellowknife, you've been influenced by coaches, leaders, employers, people who have been there to mentor you, challenge you and help you to grow. Our parents stood by our sides, helped us to study, and made certain that we had all we needed to learn. While our community may be small, it's full of people who want to see us succeed and prosper, and for that we are thankful.

We began our high school years at a weird time. Throughout 2020, and 2021, we had to deal with modified COVID schedules, we found ourselves in and out of online school. The pandemic forced us all to change the way that we learned, studied, and asked for help. It was a challenge for sure, a challenge that would have been near impossible were it not for the teachers who put in tremendous effort to preserve our education. Despite the fact that we were separated, it always felt as though our teachers were right there alongside us. They were always available and there to help us when we needed it. I will always remember biking around town finding the math problems that Mme Poitras taped to lamp posts, all in an effort to get us out of our houses. As students, we also had to adapt and find new ways to demonstrate our learning. We used old junk in our houses to make science projects, took home instruments and practiced them in our rooms (which I'm sure our parents all appreciated), and we all found new ways to overcome our situation. In the end, I believe that we all came out stronger as a result of the hardships we faced.

Of course, none of us would have been able to make it as far as we have without the support of our peers. Whether it be staying up late studying for physics tests with Loic, Joe, and Nikki, or driving around town making short films with Shawn, James, and Nole for Mr Hagen's English class, I've always felt at my best when surrounded by my friends and classmates. I've met and become friends with so many great people throughout my time at this school, and I'm truly glad to have met you all. I've had great times and learned a lot from Jesse and Tyler teaching me about history, to Byran and Sahal teaching me how to play chess (through much yelling and name calling), to James helping me out in the gym. I am a better person because of the people at this school, and I believe that many feel the same.

And to the many athletes and coaches, thank you for inspiring us all these years with your on-ice, on-court, on-field performances. We were so lucky to ride along as you prevailed in Challenge Cup, Super Soccer, Spike it, and Cager. We know how hard you worked and that in many cases you left your heart and soul out on the court, or in Jacob Mitchener's case part of his arm.

On a personal note, I would also like to thank some of the teachers who have not only had a profound effect on my learning, but who have also supported me and guided me through my years at this school. Thank you to Mme Sonia, for supporting all of us french students, for letting us stay in your class way later than we should have to finish essays, and for putting up with Byran and Sahal when we could all tell you really wanted to throw something at them. Thank you to Mr. Morozov, for helping me in pursuing my love for technology and for encouraging me to continue learning more. And to Chef, for getting me to come back to your class semester after semester, and for helping me learn to cook and eating my food even when it was potentially harmful to your health. Lastly, thank you to Ms. Schlosser for keeping us all engaged and interested in math, and putting in way more time than you needed to to make sure we had the highest chance at success. I think I speak on behalf of all of us grads when I say that all of the teachers at this school have left a lasting effect on us, and we would not be who we are today without you.

To close, I just want to state how glad I am to be standing among you all today. No, we are not who we were four years ago. The people we've met, the challenges we've gone through, and the immense amount of hard work that we have all put in from day one- has all shaped and refined us into the people we are today. I look forward to seeing everyone's achievements wherever the future may take you.

Thank you all and congratulations to the grad class of 2024!

Thank You,
Colton Tumoth
